

Priority Pricing Includes

- Software** The software price is based on the modules select number of users.
- Software comes in two flavours: Commercial and Manufacturing
- Manufacturing module contains more base modules, as well as the production module
- The number of users is defined as Named Users on the system
- There are options to name limited use or read only users that are available at a lower per user rate
- Installation Costs** The cost of installing the software depends on the type of system, complexity of solution, how much data cleaning is required, training etc.
- Typically an installation will take anything from 15-60 days
- Annual License Fee** Software developers, Eshbel, charge a license fee for use of the system
- The license covers cost of providing any updates to the system, including periodic upgrades.
- Eshbel also provide backup support for Priority ERP as required
- Annual Support Fee** As software providers we support the Priority Software and any developments. Support is limited to bug fixes and subject to our standard Service Level Agreement (SLA)
- Customisation** Priority ERP can provide development and customisation services on an as needed basis.
- Typically we would recommend purchase of Service Packages - 5, 10, 15 days that are paid in advance and attract a discount on the daily rate
- Services days can be for ANY purpose, additional support, ad-hoc developments etc.
- Developments** Priority software is the most flexible package available and comes with its own set of easy to use development tools. We at Priority ERP are expert in using these to develop bespoke add-ons that fully integrate with Priority and provide additional specific functionality to the already rich software system.
- Development services are provided at the standard daily rate. All developments are included in the support for Priority
