

 Priority

Priority Mobile ERP

Carry your business with you

Priority's mobile ERP solutions provide system features and functionality from any mobile device or tablet. That means real-time access and visibility of your business operations anywhere, and at any time, an always-on mobile application, designed to meet the needs of today's always-moving workforce.

With the number of off-site employees on the rise, others dispersed around the globe in various locations, and the surge in remote working, Priority's suite of mobile ERP applications enable you and your employees to extend Priority's system functionality while you're on-the-go.

Additionally, we believe that business processes should become simple to manage from remote locations as well. Mobile devices can often enrich information with the ability to detect location, take photos, and reach almost anyone, anywhere, any time.

It's what's inside that counts

Priority's mobile ERP runs as seamlessly on mobile devices as it does on any other device. Our mobile solutions can be easily accessed from various mobile devices, adjusting themselves to the screen size.

Priority Mobile ERP is not a single application, but rather a set of solutions that enable our customers to design their own mobile processes based on their unique workflows and needs.

Our comprehensive suite of mobile solutions includes:

- Mobile Application Generator**
An innovative tool enabling non-developers, system admins, or users to create their own mobile applications in just minutes – with no need for programming skills. A Basic Generator and Premium Generator are offered:
 - ▶ Basic - including ready-to-use-apps, and the ability to define apps
 - ▶ Premium - all of the above with the addition of more advanced options

- Out-of-the-box Mobile Apps**
A wide selection of ready-to-use mobile apps for use off-site and in the field, based on industry best practices, tailored for specific professionals – sales reps, field service providers, and more.

Mobile Application Generator

Everything you need to build awesome customized apps in just minutes!

Easily transfer all of your Priority ERP tasks and activities directly to your mobile device for a true Priority experience on-the-go! That's right. Any Priority ERP user can quickly and easily generate a mobile app from existing processes in Priority to manage their business operations. No need for programming skills, IT support, investment in development or additional costs

Benefit from high-standard apps for an enhanced user experience, Define once, run everywhere, with best practices for app practices provided by Priority. Remote and field employees can easily engage with customers where and when it matters most, and business teams can increase marketing and sales campaigns, enhance customer service and support, and make faster, better-informed business decisions using the app's real-time data and reporting.

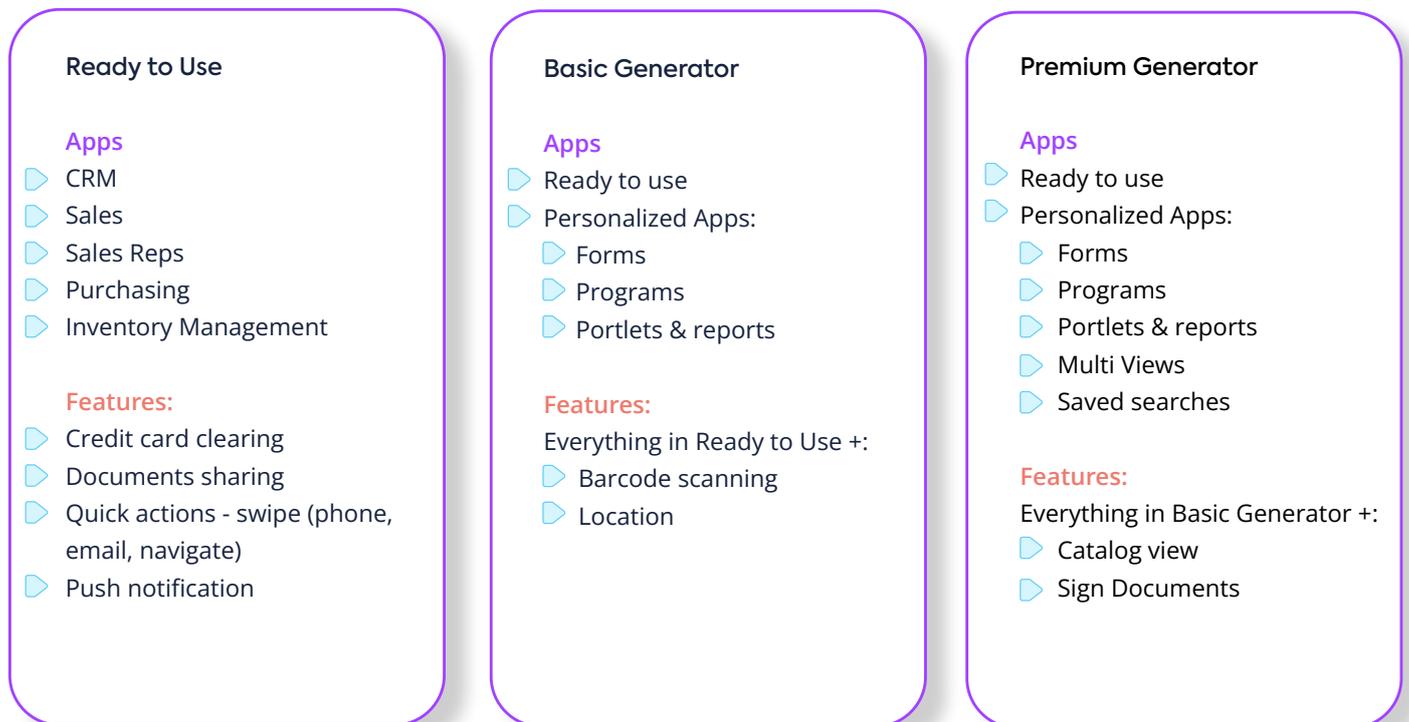

Out-of-the-Box Mobile Apps

Priority's rich portfolio of ready-to-use mobile applications gives you anytime, anywhere access to improve your business performance with real-time metrics. Benefit from a holistic view of your business processes, and maximize sales rep productivity and efficiency with up-to-date sales and customer information. With complete visibility from any mobile device or tablet, you can improve field technicians' service levels and enhance customer satisfaction, with fast out-of-office resolution directly from their mobile device.

Your organization's sales reps, field service technicians, warehouse teams, drivers, and others, can enjoy full system functionality with these out-of-the-box mobile apps available in Priority's mobile offerings:

Mobile Offerings

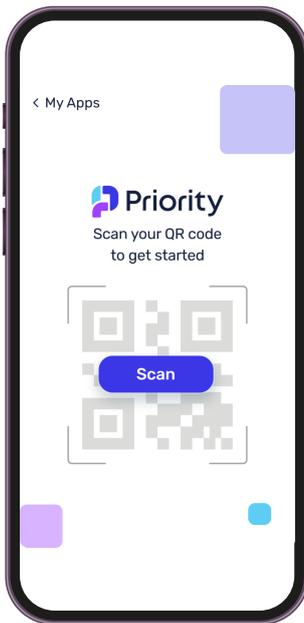

Examples:

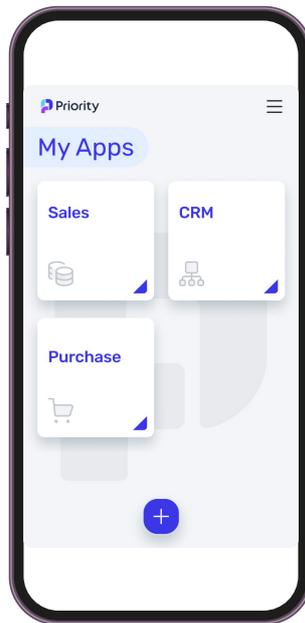

Mobilize your field sales processes with full mobile access to Priority's CRM, including real-time access to customer and sales data and documentation and sales rep daily activities. In addition, your sales reps can operate van sales, including digital customer signature, issue receipts, take photos with their mobile device and upload directly to Priority, generate real-time reports and analytics, and more.

Field service technicians can immediately access previous service call history and display real-time information via pop-up notifications. They can also open new service calls on-site, handle warranties, part replacement, take photos of a damaged part with their mobile device and upload directly to Priority. Field service technicians also benefit from digital customer signature, GPS coordinates, generate reports, and more.
